

Conical Screens

These inline pre-filter Conical Screens are a low cost strainer designed for system start up. They require no modification to your current piping structure and can be cleaned for reuse. These are recommended for temporary use and should be removed after the initial system cleaning. They are easily inserted into a spool section.

Conical Screens can be made to suit your specific requirements. They can be built with a stainless or mild steel punch plate core and available in any screen size from a 1/4" to 50 micron opening, they effectively stop damage from particulates and contaminants.

ISM Conical Screens are available same day in the most frequently used sizes. Other sizes can be manufactured with same day service if required.
